Details

Description

Solution for exceptional water flow rate. Cleaning can be performed either with cold water or with warm water from a suitable existing source. The maximum permissible water inlet temperature is 80°C. Suitable for direct connection at washing site. A maximum of 6 take-off points is possible. Made of corrosion resistant stainless steel.

Application

Professional high-pressure cleaning is indispensable for the maintenance and care of tools, rooms, outdoor areas and vehicle fleets in industry and the trades. The special advantages of stationary high-pressure cleaning come into their own in all those places where it is necessary to clean to high standards on a regular basis.

Features & Benefits

Stainless steel float tank for constant water feed
Air-cooled motor drives pump equipped with stainless-steel pistons and ceramic sleeves
Pulsation damper avoids surges in pressure in the stationary pipework system
Built-in pressure pump allows operation with hot water up to 80°C if on-site supply is available
Electrical-control is prepared for operation with multi-function remote controls
Can be extended to two remote controllable detergents with infinitely variable metering

Drum and tank cleaning

ABS barrel cleaner

The BC 14/12 is an spray system for the efficient interior cleaning of containers and barrels##, specially oak barrels with a volume of between 225 and 600 litres. One cleaning cycle is completed within 36 seconds and every spot in the container is covered by a water jet. After cleaning is finished the BC 14/12 can easily and conveniently take up the dirty water. The transformer included with the BC 14/12 makes it possible to use it worldwide (110 - 240 V, 50 - 60 Hz). The nozzle kits included make possible use with high-pressure cleaners with a water volume of 600 to 1400 l / h. Electrical components are protected in accordance with IP 55.
