Battery running time (h /min.)	2.5

Details

Description

KM 70/30 C is the successor for our KSM 690. The development is based on the very successful KM 70/20 C with all their outstanding features. Mainroller brush and side brush of KM 70/30 C are electrically driven, so sweeping corners i.e. is very simple. The push handle is triple adjustable, also foldable and offers high ease of use. Main roller brush and side brush are easily height adjustable and therefore adaptive to different surfaces. The adjustment of the main roller brush is quickly done by a knob in 6 steps. The 12-V battery and the corresponding charger (230V, safety plug) are on-board.

Application

Battery powered push sweeper with vacuum dust suction for simple and breezing cleaning of indoor areas. Almost dust-free and spring-clean purification of indoor and outdoor areas, i.e. petrol stations, pavements, gateways, storage areas also for indoor areas i.e. work shops, halls, warehouses.

Features & Benefits

Push handle adjusts in 3 stages to suit height and reach of user and can be folded completely flat for space-saving storage and also for transportation in standard cars. The EASY-Operation switch makes the handling childishly simple. Handles at front and back of the robust frame enable easy transportation i.e. over stairways. The side brush is foldable, the pressure to the surface is adjustable to the application. Very good dirt collection even with sweeping speed below 2 km/h. On-board charger and battery allow to use and charge this machine anywhere. For dust-free indoor application the machine has a vacuum dust suction combined with a manual filter shaker. Super quiet: noise emission 59 db(A) only!

Accessories
