Details

Description

The PW 10 power brush has been developed as an optional accessory for the Puzzi 200 to intensify the deep-cleaning process. This rotary brush enhances the normal cleaning performance by about 35%. It enables you to spray, brush and vacuum in a single pass.

Application

1. Spraying Water and cleaning solution penetrate the pile right down to the backing to dissolve even the most stubborn stains. 2. Brushing (main wash) Roller brush opens carpet pile, dislodges the dirt and washes it away thoroughly but gently. 3. Vacuuming (drying) Dirty water is vacuumed away at the same time through the suction duct. Carpet is dried in this process. Residual moisture content is low.
