

SWEEPEx BROOMS

Made in the USA, imported and distributed by SweepEx Australia.

The SweepEx range of brooms is available in various widths, attaching in seconds to your forklift, telehandler, backhoe, loader or tractor.

They allow for the rapid, efficient, and economical movement of many materials and the sweeping of both large and small areas.

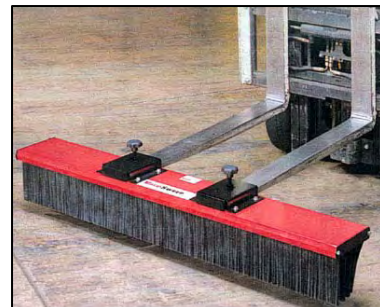

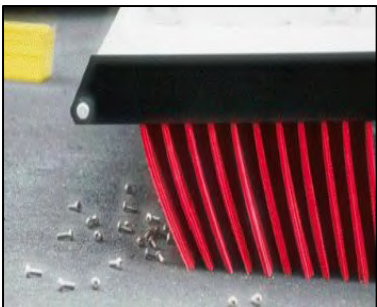

FEATURES AND BENEFITS

These ruggedly-made brooms consist of replaceable, extruded polypropylene bristles mounted into an industrial strength steel frame.

Quick, easy and inexpensive, they offer an economic way to keep your site clean and safe.

- Sweep or move grain, rubbish, sand, gravel, glass, plastic, cans, swarf, dirt, dust, sawdust, snow and mud, leaf debris and many other materials.
- Sweep materials such as plastic shrink wrap and welding wire which cannot be swept with normal rotary brooms.
- Pre sweep larger debris before using your mechanical sweeper.
- Multiple rows of durable, extruded virgin polypropylene bristles, which are easily replaceable, keep the process efficient with minimal dust.
- Most common sizes are four, five, and six foot (1.2m / 1.5m / 1.8m) with an 8 foot (2.4m) broom also available.

The SweepEx range of brooms are ideal for sweeping and moving materials in many locations including builders yards, docks and aprons, warehouses, rubbish and recycling yards, industrial sites, construction sites, farms, and grain elevators.

ADVANTAGES OF THE SWEEPEX BROOM

- Economical and practical with a powerful sweeping action at a fraction of the cost of a mechanical sweeper.
- Increased productivity will dramatically reduce your clean up time and costs.
- Long lasting, rugged construction and a long brush life to ensure over 400 km can be swept for every 100mm of bristle.
- Low maintenance with no moving parts to break or wear out and no downtime.
- Easy bristle replacement, simply slide in slide out.
- Sizes to suit ranging from 1.2m to 2.4m.
- Easy versatile mounting quickly and simply attaches to your forklift or loader.
- Safety plus with no moving parts and minimal dust.
- Easy cleaning with a hose or high pressure cleaner.
- Sweeps forward or reverse.

A SWEEP EX BROOM FOR EVERY APPLICATION

THE VALUSWEEP SERIES

Rugged yet lightweight and economical the ValuSweep is ideal for interior and exterior commercial sweeping. The ValuSweep main frame is a one piece solid aircraft aluminium extrusion. Sizes range from 1.2m to 1.5m.

THE PRO BROOM SERIES

The Pro Broom is designed for medium to heavy duty sweeping jobs. It has 8 brush rows and is engineered with the same rugged quality as the Mega Broom. The Pro Broom main frame is made from industrial strength steel with a heavy duty powder coat finish. Sizes range from 1.5m to 1.8m.

THE MEGA BROOM SERIES

The Mega Broom is designed for heavy duty sweeping jobs. It has 11 brush rows which make it suitable for the toughest sweeping needs. The main frame of the Mega Broom is made from industrial strength steel with a heavy duty powder coat finish. Sizes range from 1.5m to 2.4m.
